

Kyle Community Survey

In January of 2025, the City of Kyle worked with ETC Institute to administer a survey designed to gather citizen input and feedback on City of Kyle programs and services. This information is used to improve city services and to help us identify and address challenges facing our community and prioritize city resources effectively.

The survey, cover letter and postage paid return envelope were mailed to a random sample of households in Kyle. The cover letter explained the purpose of the survey and encouraged residents to either return their survey by mail or complete the survey online. Residents were also given the option of completing the survey in Spanish online or over the phone. The goal was to obtain completed surveys from at least 500 residents. This goal was met, with a total of 504 residents completing the survey. The overall results for the sample of 504 residents have a precision of at least $\pm 4.35\%$ at the 95% level of confidence.
